## ▣ Air Canada VPN Migration - New Delhi

Xentaqsys

IP VPN rollout – we executed the migration from legacy devices to PC LAN environment, with all their applications on PC based applications and connectivity to printer with host configuration and so on.

## ❖ Network I.T. Setup - Chennai

Xentaqsys

Turnkey office implementation for Lufthansa Station office including Network rack setup, office interiors and power setup at Chennai International Airport.

## ❖ SITA CUTE Turnkey Installation - Cochin

Xentaqsys

At Cochin International Airport, Xentaqsys is the turn key service provider for supplying and installation of entire LAN infrastructure, Power setup, Core room built up and setup of the server room with raise floor, network racks and air-conditioning.

## ❖ Global Service Desk - GSD

Xentaqsys

Lufthansa – Asia Pacific: Currently under project discussion. **Global Service Desk @ Xentaqsys** aims to provide support for the entire APAC region for Lufthansa German Airlines to process i-MACD (install, move, add, change, delete) hardware/software requests for each individual location in the region. This task upon finalization will be processed on behalf of the customer.

The above are synopsis of some of the airline projects which have been executed by us. We also provide services and support and execute IT projects for non airline companies as well. However our experiences with the above projects have given us a good insight and a strong understanding of the airline industry. Specifically while working on the SITA projects we have been able to establish strong networking and good working relations with the various airport authorities (civil, electronic, commercial etc.) and airline operating committee, thus giving us an edge and a strong hold on the airlines industry and works at the airports.

We look forward to a positive response from you. For any further queries please contact us at :
