

Hi Meeta,

It was a very big surprise, since its the first time someone has send something so big to myself in SITA.

Nevertheless, I would like to commend on the hard work from the entire team of XentaQsys for coming out with such brilliant way of handed over the detailed report on the work carried out at the various sites. This also showed the professional way of handling the requirement of handing over information, which may be referred over many years from now.

All my colleagues in Mumbai office have expressed there happiness on the professional way of sharing information and quality of printed material.

Excellent work, keep the good work going for all the sites hand-over documentation.

Regards

Rajesh Vaidya
